PROFESSIONAL SUMMARY

Final-Year B.Sc. Computer Science student with practical experience developing AI-powered applications, backend systems, IoT solutions, workflow automation tools, and intuitive user interfaces. Experienced leading a seven-member remote software development team while delivering end-to-end web and mobile applications. Passionate about solving real-world problems through Artificial Intelligence, Backend Engineering, Intelligent Automation, and Embedded Systems. Continuously learning modern software engineering practices and building production-ready applications.

CORE COMPETENCIES

- Software Engineering
- Backend Development
- Artificial Intelligence
- Intelligent Automation
- REST API Development
- IoT & Embedded Systems
- UI/UX Design
- Workflow Automation
- Team Leadership
- Technical Problem Solving
- System Architecture
- Agile Collaboration

TECHNICAL SKILLS

Programming Languages

Python • HTML5 • CSS3 • Dart • C • Java (Working Knowledge)

Backend Development

Flask • REST APIs • Authentication • SQLite • API Integration • JSON • Webhooks

Artificial Intelligence

OpenAI API • Prompt Engineering • AI Assistants • AI Agents • LLM Integration • AI Workflow Automation

Automation

Google Apps Script • Zapier • n8n • Telegram Bot API

IoT & Embedded Systems

ESP32 • Arduino • Embedded Systems • Sensor Integration • Electronics Integration • Hardware Troubleshooting

UI/UX Design

Figma • UI Design • UX Design • Wireframing • Interactive Prototyping

Tools & Platforms

Git • GitHub • Postman • VS Code • Render • Blender (Working Knowledge) • Unreal Engine (Working Knowledge)

PROFESSIONAL EXPERIENCE

Project Manager & Full Stack Developer

Lumora Devs (Remote Startup)

April 2024 – October 2024

- Led a seven-member remote development team in planning and delivering web and mobile application projects.
- Coordinated project timelines, technical discussions, and team collaboration throughout the development lifecycle.
- Designed responsive user interfaces and implemented backend functionality for client-focused software solutions.
- Participated in software architecture, testing, deployment, and continuous project improvement.
- Worked closely with developers to translate project requirements into functional applications.

Hardware Engineer

Gigabyte Services

October 2021 – October 2022

- Diagnosed, repaired, and upgraded desktop and laptop computer systems.
- Installed and configured operating systems, drivers, and productivity software.
- Performed hardware maintenance, component replacement, and system optimization.
- Configured networking devices, peripherals, and customer computer systems.
- Delivered technical support while maintaining high service quality.

FEATURED PROJECTS

A.D.A.M. (Autonomous Directive and Arbitration Machine)

AI-Driven IoT Security & Decision Support Platform

- Designed and developed an intelligent IoT monitoring platform integrating ESP32 hardware with a Python Flask backend.
- Built REST APIs to receive sensor events, process security incidents, and communicate with connected devices.
- Developed a rule-based decision engine capable of analysing physical security events and triggering automated responses.
- Integrated Telegram Bot notifications for remote monitoring, incident alerts, and command execution.
- Implemented event logging, dashboard visualization, and SQLite database management for system auditing.

Technologies: Python • Flask • ESP32 • Arduino • SQLite • Telegram Bot API • REST APIs • Git

RUNE

AI Assistant & Intelligent Automation Platform

- Developed a modular AI assistant focused on intelligent conversations and productivity workflows.
- Integrated OpenAI APIs to power contextual conversations and intelligent responses.
- Designed a scalable backend architecture supporting future long-term memory and voice interaction capabilities.
- Built reusable modules to support future expansion into automation and personal productivity features.

Technologies: Python • Flask • OpenAI API • SQLite • REST APIs

TalentFlow AI

AI Recruitment & Career Platform

- Designed and developed an AI-powered recruitment platform connecting recruiters with job seekers.
- Implemented recruiter and applicant dashboards, authentication, job management, and AI-assisted workflows.
- Developed backend APIs supporting scalable application management and user interaction.
- Designed responsive interfaces focused on usability and accessibility.

Technologies: Python • Flask • HTML • CSS • SQLite • OpenAI API

E-Learning Management System

- Developed a learning management platform supporting students and lecturers.
- Implemented authentication, course management, and academic workflows.
- Designed backend architecture supporting scalable educational services.

Technologies: Python • Flask • SQLite

Medical Appointment & Patient Management System

- Developed a healthcare management platform supporting appointment scheduling and patient record management.
- Implemented secure authentication and administrative features for healthcare workflows.

Technologies: Python • Flask • SQLite

Google Workspace Automation

- Automated repetitive workflows across Google Forms, Google Sheets, and Google Drive using Google Apps Script.
- Reduced manual administrative tasks by creating automated document processing workflows.

Technologies: Google Apps Script

LEADERSHIP & CAMPUS INVOLVEMENT

- Project Manager, Lumora Devs
- Technology Lead, Tech Pantheon
- IT Committee Member, Student Representative Council (SRC)
- University Coding Tutor (C Programming)
- Church Media Team Volunteer

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Michael and Cecilia Ibru University

Expected Graduation: 2026

CERTIFICATIONS

- Python Programming (Coursera)
- Flutter Development (Udemy)
- UI/UX Design (Udemy)
- Advanced UI/UX Design (Udemy)

ACHIEVEMENTS

- Winner, Secondary School Mathematics Competition.
- Led a seven-member remote software development team.
- Developed multiple AI-powered, IoT, and workflow automation applications.
- Designed and deployed end-to-end web applications across healthcare, education, recruitment, and intelligent systems.

INTERESTS

Artificial Intelligence • Backend Engineering • Embedded Systems • Workflow Automation • UI/UX Design • Game Development • Piano • Emerging Technologies

LANGUAGES

English (Fluent)
